

## Online workshop

# The role of businesses in boosting renewable energy in Central and Eastern Europe

Wednesday, 20 October 2021, 14:00-16:00 CET, Zoom

Ahead of the UN climate conference COP26 in Glasgow, businesses across the world have pledged to achieve net zero emissions as part of the [UN Race to Zero Campaign](#). Sourcing renewable energy is a vital step for businesses to reduce their emissions. Renewables can also provide businesses with cheaper and more reliable energy if the right policy frameworks are in place. In a private setting, this workshop will allow businesses to learn about options for corporate renewable energy sourcing. Business leaders from Central and Eastern Europe will provide first-hand experience on how to set and implement climate and renewable energy targets and how membership of business initiatives which are part of the UN Race to Zero Campaign helps them reach their goals.

The workshop will bring together businesses, renewable energy associations and experts from the Visegrad countries, Bulgaria and Romania. It is organised by the Visegrad+ for Renewable Energy Platform, a coalition of renewable energy associations and think tanks from the Visegrad countries and Austria, and financed by the UK Department for Business, Energy & Industrial Strategy.

Please register [here](#) until **18 October 2021**. You will be provided with a Zoom link before the workshop.
